Introduction

BOOYAH is a community-first meme coin project preparing to launch on Solana. Inspired by internet culture and the universal thrill of victory, it aims to create a welcoming home for memes, creativity, and celebration.

BOOYAH is not presented as a technical protocol or guaranteed investment. Its focus is a memorable identity, transparent development, and a community that can celebrate wins together.

Vision & Mission

Our vision is to build a recognizable community-driven meme brand. Our mission is to celebrate internet culture, encourage original creativity, communicate transparently, and grow responsibly without promising financial returns.

Why Solana?

Solana offers fast transactions, low network fees, broad wallet support, and an active community. These characteristics make it a practical network for a community-focused token.

The BOOYAH Community

The BOOYAH Crew is the heart of the project. Community participation may include memes, feedback, contests, events, and future campaigns. Participation does not create an expectation of profit or ownership in a business.

Purpose & Utility

\$BOOYAH is planned as a community meme token. It does not represent equity, debt, ownership, voting rights, guaranteed access, or a promise of revenue. Any future utility will be announced only after it is designed and reviewed.

Proposed Tokenomics

These details remain proposed until deployment. Material changes will be disclosed through official channels.

Item	Proposed detail
Network	Solana
Ticker	\$BOOYAH
Total supply	70,000,000,000
Community & liquidity	80% (56B)
Marketing	10% (7B)
Development	5% (3.5B)
Community rewards	5% (3.5B)

Before launch, BOOYAH intends to publish the final supply, mint and freeze authority status, allocation wallets, liquidity approach, and official contract address.

Roadmap

Phase 1 - Brand

Brand identity, domain, website, and visual direction.

Phase 2 - Digital Presence

Official website, X profile, Discord community, Telegram setup, and synchronized public links.

Phase 3 - Documentation

Litepaper, tokenomics, roadmap, FAQ, safety guidance, and legal disclosures.

Phase 4 - Launch

Final token parameters, technical review, metadata, liquidity planning, Solana deployment, and verified contract publication.

Phase 5 - Growth

Tracker submissions, community campaigns, and exchange applications when eligible.

Project Decisions

BOOYAH is currently organized by its project contributors and is not represented as a decentralized autonomous organization. Material changes to token parameters, allocations, or launch plans will be announced through official channels.

Security & Transparency

BOOYAH will never request a seed phrase or private key. The official contract address will only be published after deployment on booyahcoin.io and confirmed social channels. Users should independently verify all addresses before interacting.

Independence

BOOYAH is an independent community project. It is not affiliated with, sponsored by, or endorsed by Popeyes, Chick-fil-A, their owners, or any other restaurant or third-party brand.
